

## **technical facility management**

**turnkey energy management solutions**

**HVAC (heating, ventilation and air conditioning)**

**integrated facility solutions**

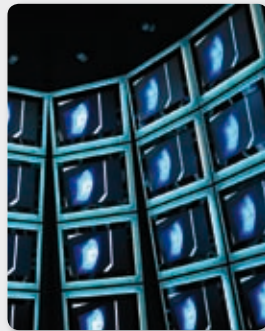

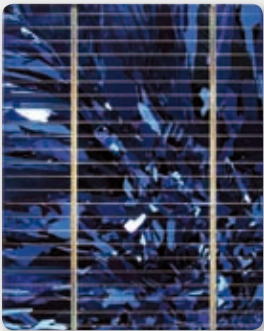

**complementary facility services**

**building management system**

” GTC can offer you complete facility management for your facilities and buildings, including operating and maintaining technical equipment at the facility and managing all infrastructure. ”

Professional Facility Management (FM) involves the permanent analysis and optimization of cost-relevant processes related to facilities and services provided in business buildings. As assets become more and more sophisticated to manage, the challenges on FM are increasing, both in terms of services to be provided and concerned responsibilities involved. GTC Facility management and technical management take care of all these aspects. You focus on your core business, and we will take care of everything else.

**Turnkey energy management solutions**

- Feasibility Analysis
- Design, planning and construction
- Consumption optimization
- Renewable energy solutions
- Data collection and metering technologies

**HVAC Solutions (Heating, Ventilation and Air conditioning)**

- Design, planning and implementation
- Infrastructure initiation
- Improve Equipments reliability and uptime

**Integrated facility solutions**

- Advanced Technologies for more productive facilities
- Automated and digital monitoring and reporting systems

**Complementary facility Services**

- Inventory management & Warehousing
- Air, water and Gas pressure Networks

**Building Management System**

- Fire detection
- Access control
- Intrusion detection
- Video monitoring
- Lighting control
