

ICT services

ICT infrastructure
managed networks & data centers
software development

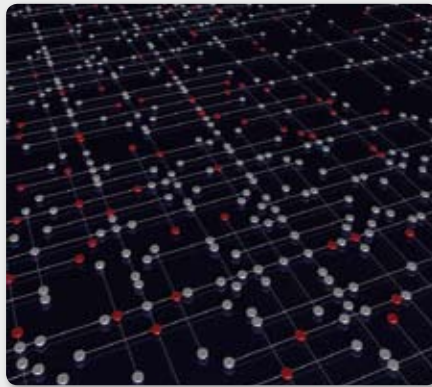

In all project phases, from planning to implementation and operation, the experienced team of GTC will support you to operate your network cost- and performance-optimized.

In the field of Information and Communication Technology (ICT) services, there will never be a universal answer to a company's needs and therefore an individual solution must be constructed for every company - using the most granular building blocks available. Therefore GTC's ICT services include both traditional telecommunication resources, as well as state-of-the-art IT solutions. With these possibilities GTC will find an optimized solution for your company's needs.

ICT Infrastructure

- **Network & System design**
(LAN/WAN)
- **Infrastructure implementation**
(Structured cabling, supply and installation of all networks components and operate them as well)

Managed Networks & Data Centers

- **Corporate Networks studies**
(data rates, load analysis, etc.)
- **Network optimization and QoS enhancement**
- **Reliable solutions for content security and data loss prevention**

Software Development

- **Vast experience in web application development**
- **Hand held device applications development** (iPhone & iPad, Android platforms and BlackBerry)

Feasibility studies · Network planning · Project planning · Project management
Operational support · Electronic Manufacturing Service · System integration
Commissioning · Installation · Staff training · Maintenance
